Williams, D. J., 139

SUBJECT INDEX

Butadiene, polymerization catalyzed by rhodium, 1
Butyl acrylate, copolymerization with vinyl acetate, 321
Colloids, displacement from interfaces, 275
Detergent dialysis, mechanism of, 291
Emulsifiers, for vinyl chloride polymerization, 69
Ethyl acrylate, copolymers with methyl methacrylate, 311
Ethylene, kinetics of polymerization, 35
  mechanism of polymerization, 35
Half-life measurements, 119
Kinetics, emulsion polymerization, 139
  ethylene polymerization, 35
  methyl methacrylate polymerization, 95
  vinyl chloride polymerization, 49

Latex, disposition of surfactant in, 291
Latex particle size, 183
Latex polydispersity, 171
Latexes, packing efficiency, 253
Latices, absorption onto, 263
Light scattering, for latex particle size determination, 183
Methyl methacrylate, copolymers with ethyl acrylate, 311
kinetics of polymerization, 95
Molecular weight distribution, of polystyrene emulsions, 207
Noble metals, as catalysts, 7
Olefins, as catalysts, 7
Particle size distribution, 195
of polystyrene emulsions, 207
Polystyrene latices, characterization, 237
Semicontinuous emulsion polymerization, 77
Siloxanes, polymerization, 27
Size distribution, stochastic approach, 149
Turbidimetry, for particle size distribution determination, 195
Vinyl acetate, copolymerization with butyl acrylate, 321
Vinyl chloride, kinetics of polymerization, 49
polymerization, 69
